

# CI Weekly Features: December 1, 2012

## **Buy-and-Hold Versus Market Timing**

A look at Theodore Wong's research into building a moving average crossover system and testing it against a buy-and-hold approach.

## **Chartastic**

Chartastic is a free online charting service that offers ample, easy-to-use features.

## **The Cash Conversion Cycle**

Measuring a company's ability to efficiently convert resource inputs into cash flows and why this is important for investors.

## **Gadget Corner - Samsung Galaxy Note**

The Samsung Galaxy Note is designed to be a hybrid between a phone and a tablet, aptly nicknamed by many in the industry as a "phablet."

## **Featured App - RedLaser for iOS, Android & Windows Phone**

RedLaser allows users to scan bar codes and then comparison-shop at online retailers and local brick-and-mortar stores to find the lowest price available.

## **This Week's Question**

Did you make an online purchase on "Cyber Monday"?

A) Yes

B) No
