

Multiscreen Selector and Crosstab Report

We hope all *Stock Investor Pro* subscribers are aware by now that Stock Investor Pro 4.0 was recently released. In addition to programming the software to perform automatic updates, we also added a major function that has long been requested by AAI members: the ability to see which companies are passing multiple stock screens.

This installment of Stock Investor News walks you through using the new Crosstab Report, which allows you to find companies that are passing several screens and filter for the companies that are passing the most number of screens.
