

# Computerized Investing's New February Content

## **Computerized Investing's new February content is now available!**

This month includes:

### **CI's Best of the Web for Personal Finance, Retirement Planning and Tax Resources**

An update of the websites that offer the best guidance and tools for personal financial planning issues, including budgeting, handling your taxes and getting ready for retirement.

### **Classic Technical Indicators: Advanced Interpretations of the RSI**

Part three of a series on the relative strength index takes a look at six specific and direct applications for using this popular technical indicator.

### **Robo Report: Q4 2017 Performance Review & Glitches in Volatile Markets**

Ken Schapiro, president and founder of BackEnd Benchmarking, discusses the fourth-quarter 2017 performance and service outages experienced by robos during recent high-volatility trading days.

*Also, don't forget to share your thoughts with the new CI Reader Survey question.*
